A decorative border at the top of the slide featuring several dark brown coffee beans with white highlights, scattered across the width of the image.

INNOVATE 4 SDSU PROJECT:

EspressoGo

"We find, you go"

Lip, Lucas, My Ky, Joy

PROBLEM:

Terrible Venues

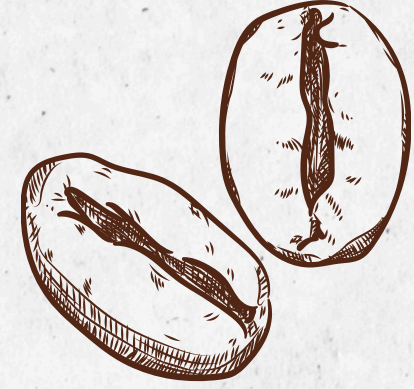

Terrible Drinks

Indecision

SOLUTION:

ESPRESSGO

What is it?

Website that takes a your specific requests for your ideal coffee shops and cafes generates the best results:

- Inputs - Zip code, drinks, specific shops
- Outputs - Nearby shops, Menus, reviews, star ratings

Key Featrures:

- Interactive AI Chatbot
- Corresponding Reviews
- Corresponding Map

PROJECT COMPOSITION

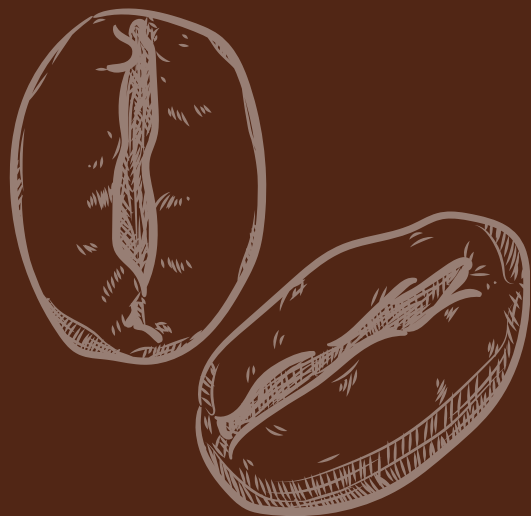

Website

Frontend – React(Javascript)

Backend – FastAPI (Python)
Ollama Server
Google Cloud API

Tools

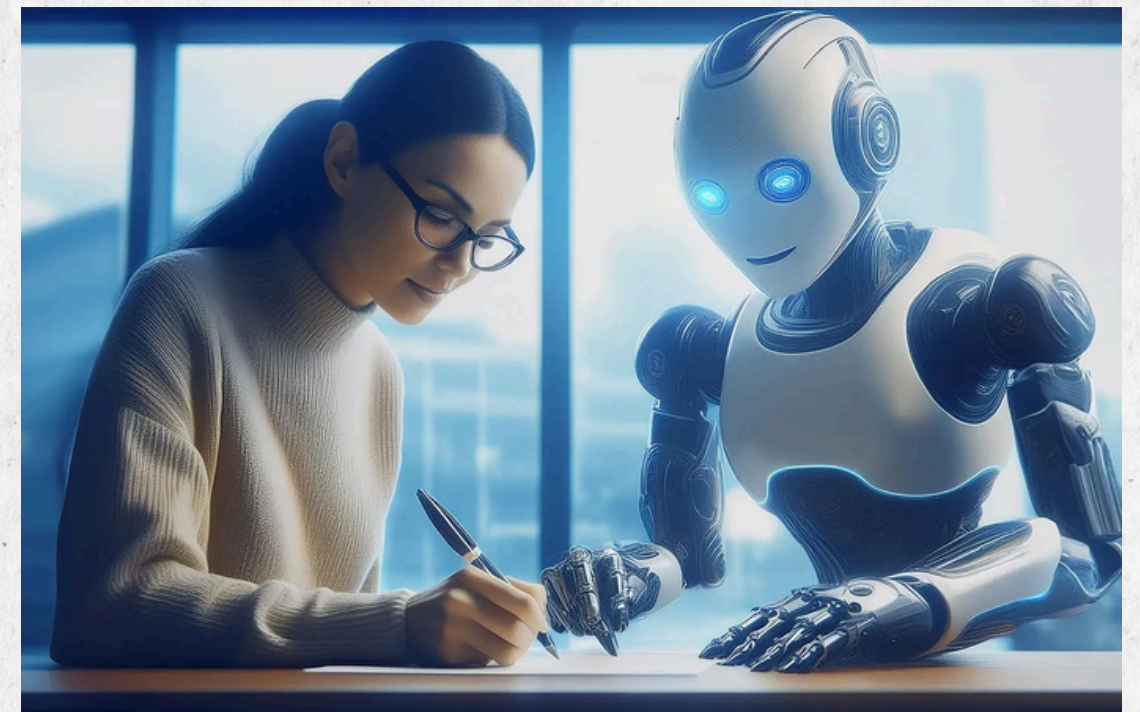

- **ollama**
- **node.js**
- **Google API services**
- **axios**
- **Docker**
- **Python**

AI USAGE

Frontend - Using Copilot install the dependency for React

Chatbot - Research chatting model with Chat GPT (Ollama Qwen)

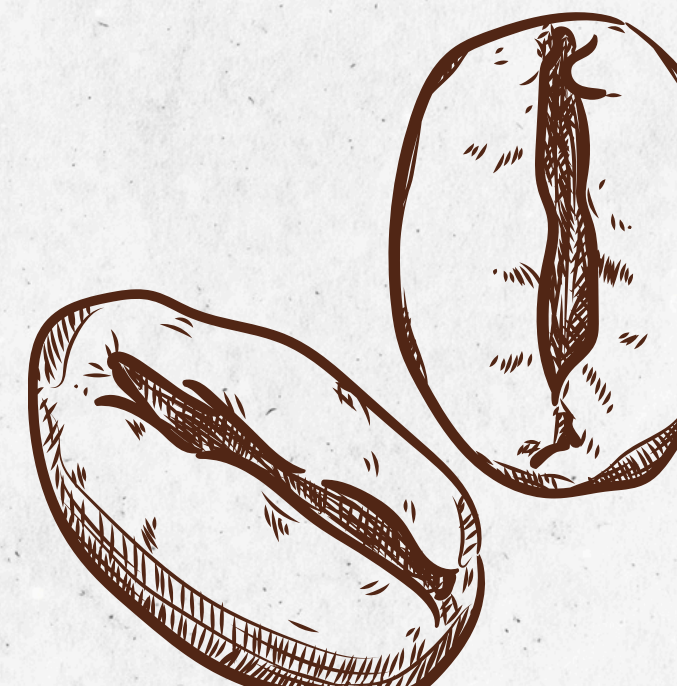

CODE SNIPPET

```
1 // src/App.js (FIXED V9)
2 import React, { useState, useEffect } from 'react';
3 import axios from 'axios';
4 import LeftPanel from './LeftPanel';
5 import RightPanel from './RightPanel';
6 import './App.css';
7
8 /** ----- Tool schema the LLM can call ----- */
9 const GOOGLE_MAPS_TOOL = {
10   type: 'function',
11   function: {
12     name: 'google_maps_lookup',
13     description:
14       'Search for address/rating/reviews and a Google Maps embed URL for a location.',
15     parameters: {
16       type: 'object',
17       properties: {
18         query: {
19           type: 'string',
20           description: 'Full place name + area (e.g., "Starbucks San Jose").',
21         },
22       },
23       required: ['query'],
24     },
25   },
26 };
27
28 /** ----- Endpoints & config (from .env) ----- */
29 const OLLAMA_CHAT_URL =
30   process.env.REACT_APP_OLLAMA_URL || 'http://127.0.0.1:11434/api/chat';
31
32 const FASTAPI_API_BASE = process.env.REACT_APP_BACKEND_URL
33   ? `${process.env.REACT_APP_BACKEND_URL}/api/place-details`
34   : 'http://127.0.0.1:8000/api/place-details';
35
36 const OLLAMA_MODEL = process.env.REACT_APP_OLLAMA_MODEL || 'qwen';
37 const MAX_AGENT_STEPS = 4;
38
39 function App() {
40   const [messages, setMessages] = useState([
41     {
42       role: 'assistant',
43       content:
44         'Hello! I can search coffee shops and show the map. What place are you looking for?',
45     },
46   ]);
47   const [mapUrl, setMapUrl] = useState('');
48   const [placeDetails, setPlaceDetails] = useState(null);
```

DEMO

THE FUTURE

1.Strengthening our current features

2.Community

- login + account creation
- “reddit features”
- building social network

THANK YOU
